MASTER PROMPT RULES

Fixed-base instruction	Use the attached photo as the fixed base image. Edit only the existing railing system or open edge. Do not recreate or redesign any other part of the photograph.
Preservation instruction	Preserve the staircase, flooring, walls, windows, doors, deck or balcony structure, furniture, landscaping, pets, lighting, pool, hardscape and all surrounding elements exactly as shown. Only replace or add the railing system.
Base Shoe logic	Install a frameless clear glass railing seated continuously in a low-profile base shoe running along the existing edge. The bottom edge of the glass must sit inside the continuous base shoe. Do not use individual spigots, posts, clamps or vertical framing.
Spigot logic	Install a frameless clear glass railing supported by individual spigots attached along the existing edge. Do not add a continuous bottom channel, base shoe, posts or vertical framing.
Existing railing	Remove only the existing railing system and replace it with the selected glass railing. Preserve the supporting architecture and geometry.
Open edge	Add the selected glass railing only along the existing open edge. Do not extend, reshape or relocate the edge.
Pool with existing fence	Use the existing fence line as the guide for the new glass pool balustrade. Preserve the pool shape, pool deck, furniture, landscaping, structures, lighting, signage and all surroundings exactly as shown.
Refinement rule	Use the most recent rendered image as the base. Keep all correct elements locked. Only make the changes specifically listed.
Design Your Own rule	Use only the consumer's existing-space photo plus their selected application, railing system, handrail choice and finish. Do not require or assume a reference image.
Match Inspiration rule	Use the consumer's existing-space photo plus their uploaded inspiration image. The inspiration image is optional and applies only when the consumer selects the Match Inspiration path.
